

# REMEDIAL SITE ASSESSMENT DECISION - EPA REGION IV

Page 1 of 1

EPA ID: GAD981258270 Site Name: CONSTITUTION ROAD DRUM SITE

State ID:

Alias Site Names:

City: ATLANTA

County or Parish: DEKALB

State: GA

Refer to Report Dated: 08/25/2005

Report Type: COMBINED PA/SI 001

Report Developed by: STATE

## DECISION:

☒ 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

☒ 1a. Site does not qualify for further remedial site assessment under CERCLA (No Further Remedial Action Planned - NFRAP)

☐ 1b. Site may qualify for action, but is deferred to:

☐ 2. Further Assessment Needed Under CERCLA:

2a. Priority: ☐ Higher ☐ Lower

2b. Other: (recommended action) NFRAP (No Further Remedial Action Planned)

## DISCUSSION/RATIONALE:

The U.S. Environmental Protection Agency (EPA) has determined that no further remedial action by the Federal Superfund program is warranted at the referenced site, at this time. The basis for the no further remedial action planned (NFRAP) determination is provided in the attached document. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the site unless new information warranting further Superfund consideration or conditions not previously known to EPA regarding the site are disclosed. In accordance with EPA's decision regarding the tracking of NFRAP sites, the referenced site may be removed from the CERCLIS database and placed in a separate archival database as a historical record if no further Superfund interest is warranted. Archived sites may be returned to the CERCLIS site inventory if new information necessitating further Superfund consideration is discovered.

Only a small proportion of containers abandoned at the site have been characterized as potentially hazardous. Soil samples revealed releases of metals above background levels at the site, but levels are still relatively low compared to Region9 PRGs. There are few targets in the surface water pathway and metals attribution is not clear since the PPE is in an urban stream with numerous potential industrial sources including landfills. Urban stream had visible debris such as tires, cans, metal, trash, etc. An observed release was not found in the stream in the vicinity of the site. GW pathway is not prominent and groundwater data was not collected for this study. Removal action is ongoing.
